

Academy

**Foundation Course in Diabetes Care
for Health Professionals**

This 100% online modular Course for health professionals will provide accessible foundational insights into the care of diabetes and related chronic conditions of lifestyle.

Completion of this Course will also start the structured education journey for aspirant CDE-Accredited Healthcare Professionals, facilitating entry-level CDE-Accreditation valid for a period of one year.

Various technical topics will be covered, ranging from the pathophysiology of diabetes to foot care, as well as current insights into the vital 'softer' skills of diabetes education and coaching. *Experienced specialist health professionals* have authored each module from the perspective of their various fields of expertise and their wider role in the *interdisciplinary diabetes care team*.

Each Module will have extensive pre- and post-module assessments and reflections to promote active learning. A summative post-course assessment (pass mark 80%) will conclude the Course.

This Course has been accredited for 20 Continuing Education Units – 1 CEU per hour
(University of Pretoria, Faculty of Health Sciences Activity Number: MDB005/067/08/2019)

Cost: R999 (VAT Excl.) per person

Available: October 2019
